NextHealth

Re: iOS Developer

Dear NextHealth,

As a iOS Developer I am very excited about the current opportunity to work at NextHealth. I hope that with my skill set and passion for mobile development I am able to get an interview to better explain the contribution I will deliver.

I have always been a problem solver. Daily challenges keep me motivated and hungry. With that attitude for the last two years I have been an iOS/mobile dev hobbyist. Learning Objective-C and now Swift, I launched three (3) native iOS Apps and ported one of those to Android. The (3) apps are WhatPaint, StayAerobic and KneeFit. I launched my iOS app to the AppStore in 2012. (<http://www.appstore.com/whatpaint>).

Given the opportunity I'm convinced I will contribute tremendously to NextHealth. I am looking forward to being part of the Dev team at NextHealth.

Sincerely,

Alex Paul
